DETAILED ACTION
EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James K. Okamoto on July, 15, 2008.

The application has been amended as follows:

Claim 11: (Currently Amended) A method of responding to receipt of a mesh traceroute packet during an automated path tracing, the method comprising:

receiving the mesh traceroute packet at a mesh switch; and

if the mesh switch is determined to comprise a hop mesh switch, then appending a hop entry to the mesh traceroute packet, wherein the hop entry includes at least a hop media access (MAC) address, a hop in-port, and a hop out-port, and forwarding the packet via the hop out-port to a next mesh switch; and

if the mesh switch comprises is determined to comprise a destination mesh switch, then filling in at least a hop in-port in the hop entry, marking a trace complete flag, and returning the packet towards the original mesh switch via the hop in-port.

Claim 13: Cancelled.

Allowable Subject Matter

Claims 1-7 and 9-11 are allowed.

The following is an examiner's statement of reasons for allowance:

Bare, U.S Patent No. 6,947,384 B2, discloses a method for disseminating MAC addresses for discovered network devices through a plurality of network switches. Bare does not teach or fairly suggest the features, "wherein the mesh traceroute packet as returned includes a plurality of hop entries providing a path trace from the original mesh switch through the switching mesh to the specified destination, each hop entry including a hop media access (MAC) address, a hop in-port, and a hop out-port" as recited in independent claims 1 and 9, and argued on pages 1-8 of the Remarks. Bare also does not teach or fairly suggest the limitation "if the mesh switch comprises is determined to comprise a destination mesh switch, then filling in at least a hop in-port in the hop entry, marking a trace complete flag, and returning the packet towards the original mesh switch via the hop in-port" as recited in claim 11 and argued on pages 1-8 of the Remarks.

Claims 2-7 and 10 are allowed because they depend on allowed claims 1 and 9 respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
